The Cyclone Bass is a compact subwoofer designed to deliver low-frequency performance in outdoor and open environments. Its fibreglass composite enclosure, UV-resilient finish and IP-55 rating support reliable operation, while its form allows for integration into a range of applications.

A single high-powered 12 inch low-frequency driver delivers controlled low-frequency output. The reflex-loaded enclosure supports low-frequency extension, maintaining consistent performance across a range of environments.

Designed for ease of installation, the Cyclone Bass features weather-resistant input glands with Phoenix connector and link-through functionality for simple and efficient system integration.
