Made for every space

The Venu Series brings discreet contemporary design to spaces where aesthetics and functionality go hand in hand. The compact Venu 6 V2 and Venu 8 V2 blend effortlessly into boutique studios, gym floors and multi-purpose spaces, complementing modern interiors with a clean, understated appearance while delivering flexible installation solutions.

Depth when it matters

The Venu Series is supported by a comprehensive range of passive and powered subwoofers, allowing systems to be tailored for every application. Models including the Venu 208i, Venu 210i V2 and Venu 215i V2 combine integrated DSP giving low-frequency extension, bringing greater depth and warmth to music where a fuller, richer sound is desired.

Naturally distinctive

Available for the Venu Series, the Natural Wood Collection introduces carefully crafted Barewood and Vintage finishes for spaces where materials are as important as performance. Built to the same acoustic and structural standards as every Venu enclosure, these real wood finishes bring warmth and character to premium health and wellbeing interiors.

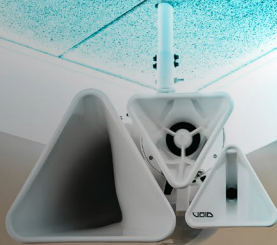

NATURAL WOOD COLLECTION

VOID

Visually striking

From the sculptural Air Motion to the distinctive Tri Motion, the Air Series is designed to leave a lasting impression. Available in a wide range of custom RAL colours and signature KROME finishes, each system can be tailored to complement brand identity, interior design and surrounding materials, creating a solution that is as distinctive visually as it is acoustically.

Make a statement

The Air Series combines bold sculptural design with powerful sound where audio is part of the experience. The compact Air 8 and striking Airten V3 create a distinctive visual centrepiece, bringing personality to boutique studios, premium fitness spaces and contemporary interiors. Their iconic form complements modern architecture, making them a defining feature that enhances both the character and atmosphere of the space.

Built for the outdoors

The Cyclone 55 delivers reliable, high-quality sound for outdoor and weather-exposed spaces where performance and design go hand in hand. Ideally suited to poolside areas, spa terraces, wellness resorts and outdoor leisure facilities, its durable construction and wide range of custom RAL colours allow it to integrate seamlessly with surrounding architecture while providing dependable performance in demanding environments.

Feel the difference

The Cyclone Series is supported by a range of passive and powered low-frequency solutions, including the Cyclone 208, Cyclone Bass and powered Cyclone 208i. Designed to bring greater depth, warmth and impact to music, they provide flexible system options for applications where greater low-frequency performance is required.

Form with purpose

The Indigo Series combines sculptural design with clear, balanced sound for premium health and wellbeing spaces where design is carefully considered. The distinctive fibreglass enclosure and minimalist form of the Indigo 6s and Indigo Pro sit naturally within boutique wellness studios and contemporary movement spaces. The Indigo Sub adds low-frequency extension, bringing greater depth and warmth to music where a richer sound is desired.

Seamlessly integrated

The Cirrus 6.1 brings discreet, high-quality audio to health and wellbeing spaces where a minimalist aesthetic is essential. Its understated ceiling-mounted design blends effortlessly into contemporary interiors, delivering clear sound for studios, changing facilities, reception areas and multi-purpose spaces. Designed to complement the environment rather than dominate it, the Cirrus 6.1 allows the focus to remain on the space and the experience.

Power with confidence

Bias and Inca amplifiers combine intelligent system control with the reliability required for everyday operation. Designed for efficiency, ease of use and long-term performance, they deliver consistent power while helping to reduce energy consumption and operational costs. Together with Void loudspeakers, they provide a complete audio solution engineered for dependable performance across every health and wellbeing environment.

Designed around your space

Every health and wellbeing environment has its own identity, which is why customisation has always been part of the Void Acoustics approach. Across multiple product ranges, bespoke RAL colour matching, signature KROME metallic finishes and the Natural Wood Collection provide the flexibility to complement interior palettes, architectural details and brand identity. Whether designed to blend seamlessly into a space or become a defining visual feature, every finish is created to support the overall experience.

Heated Room

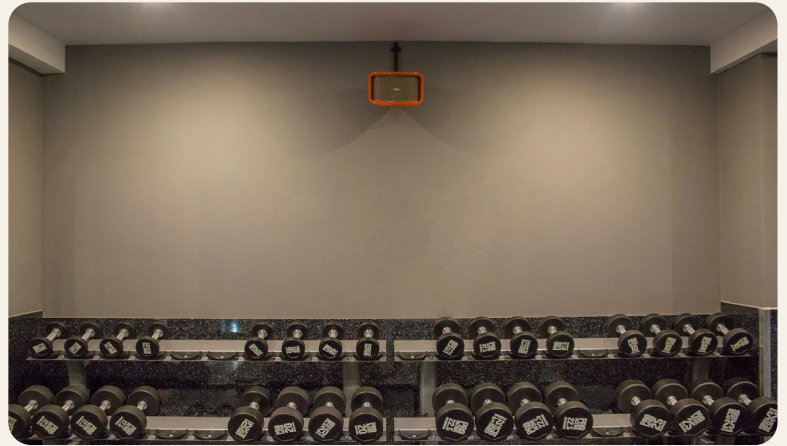

Heated Room is a boutique Pilates studio in West Hollywood, combining infrared heated workouts with a carefully curated wellness environment. Designed to energise and inspire, every element of the space contributes to the overall experience, with audio playing a central role in creating the atmosphere.

Having first experienced Void Acoustics several years earlier, founder Raamy Fares knew the brand would be integral to bringing his vision to life. Every area of the venue was carefully specified and tuned to deliver an immersive, consistent listening experience throughout.

Void loudspeakers are deployed across the venue, with iconic red Airten V3 loudspeakers and Venu 212 V2 subwoofers providing powerful, dynamic sound in the main Pilates studio. Elsewhere, Indigo 6 Pro, Indigo 6s and

Cirrus 6.1 loudspeakers deliver refined, balanced audio throughout communal spaces and changing facilities.

“I first heard Void five years ago and was immediately blown away by both the purity of the sound and the design. When the idea for Heated Room came to life, I knew Void was the only brand that matched my vision for pristine audio and the overall experience we wanted to create.” Raamy Fares, Owner & Founder of Heated Room

Volt Gym, Lancashire

Volt Gym in Burscough, Lancashire, was created as a premium fitness destination, combining high-end equipment, contemporary interiors and carefully considered lighting to create an environment that motivates members from the moment they arrive. To complete the experience, a customised Void Acoustics sound system was selected to deliver consistent, high-quality audio throughout the facility.

Designed to support every stage of the member journey, the multi-zone system features Cyclone 55 loudspeakers paired with Venu subwoofers, providing clear, powerful sound across every training area. Whether supporting focused individual workouts or energising busy peak sessions, the system helps create an atmosphere that keeps members engaged from their first workout to their last.

Specified in a custom RAL colour, Traffic Orange, the Cyclone 55 loudspeakers were finished to complement Volt Gym's bold industrial interior, becoming an integral

part of the venue's visual identity while delivering the same trusted acoustic performance.

"My first experience with Void Acoustics was a real baptism of fire at Dimensions Festival. It was an otherworldly experience, with the system sending ripples through everyone around me. When the opportunity arose to open a gym, I made a beeline for Void Acoustics. The colour customisation was another major factor in our decision." Alasdair Mitchell, Owner of Volt Gym.
